

# Interactive Platform Development for Feed the Future Research Technologies

Project Title	Interactive Platform Development for Feed the Future Research Technologies
Project Summary	Develop an online, interactive network of resources focused on disseminating information and research advancements under Feed the Future and its network of U.S. universities and international and national research center partners.
Country	United States
Country/Region of Focus	Global

## Project Description

Through a portfolio of cutting edge programs, Feed the Future research engages experts to answer global food security questions and develop innovations that are critical to the future of agriculture in developing countries, as well as in the US. The USAID/Bureau for Food Security research team seeks driven and innovative interns with an interest in research communication and coordination to work with subject matter experts to support the development of platforms and communication strategies for showcasing evidence-based advancements from research investments. Specific projects will involve utilizing innovative ways to strategically capture and share technical knowledge, create visuals, map activities, and analyze and evaluate communication initiatives. Communication projects, such as success stories and web content, can be assigned. Strong communication and analytic skills are required. Experience with collaboration platforms, database management and website development are essential.

## Required Skills or Interests
